

## THE NEW COLD SOLUTION

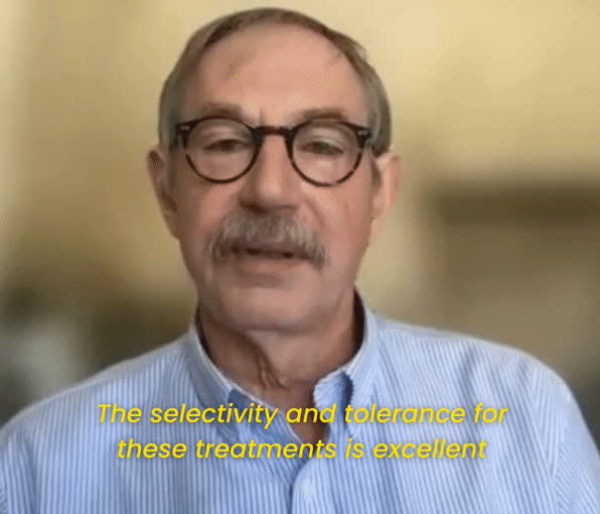

Glacial<sup>®</sup> Rx is the first and only CryoAesthetic™ treatment that uses precision cooling to fight inflammation and reset better skin from within.

Glacial<sup>®</sup> Rx is a customizable precision cooling platform that includes multiple modalities to help providers achieve the best outcome for each patient. With one handpiece, providers can target multiple skin concerns, ranging from removing benign lesions, to reducing inflammation to brightening skin and more! With the Dermabrasion tip, Glacial<sup>®</sup> Rx can also provide general dermabrasion to the skin.

This innovative platform can also be used in conjunction with lasers and other dermatological treatments to minimize pain, inflammation, and thermal injury during those procedures. Instead of inducing discomfort like heat and light-based devices may sometimes cause, the precision cooling effect from Glacial<sup>®</sup> Rx also delivers topical anesthetic relief.

DR. ROX ANDERSON DISCUSSES  
HOW CONTROLLED COOLING LEADS  
TO CLINICAL OUTCOMES  
With Kristine Tatsutani, PhD

*The selectivity and tolerance for these treatments is excellent*

### Exclusive Interview with Dr. Rox Anderson

Our renowned scientific founder, Dr. Rox Anderson, discusses cryomodulation and where he sees the precision cooling device fitting into today's medical landscape.
